Sigmoid function

WI

LeCun
method 1

$$\text{Var}(W) = \sqrt{\frac{1}{n_{in}}}$$

WI

Xavier
method 2

$$\text{Var}(W) = \sqrt{\frac{2}{n_{in} + n_{out}}}$$

WI

Paper

Understaining the difficulty of training deep feedforward neural networks

WI

ReLU Weigt initialization

He Initialization

$$Var(W) = \sqrt{\frac{2}{n_{in}}}$$

Bias Initialization

Bias \Rightarrow 0

ReLU \Rightarrow Bias 0.01

감사합니다

THANK YOU
